

TRIUMPH

TRIUMPH

The photography within this brochure shows Triumph motorcycles being used by expert professional riders in protective gear under professionally controlled, closed course conditions. Triumph does not endorse or encourage stunts, tricks or any form of irresponsible riding.

At Triumph, we want every ride to be safe and enjoyable. Always ride safely, defensibly and within the limits of the law. Always ride appropriately for road conditions. Always ride within your ability.

Take a riding skills course. Always wear an approved helmet, eye protection and appropriate protective clothing. Always insist that all passengers do the same. Never ride whilst under the influence of alcohol or drugs. Study your owners' manual and inspect your Triumph motorcycle before riding.

Data given to UK market specification.

*Silencers
Unless otherwise stated Triumph Accessory Silencers do not conform to EPA noise standards. Use on a motorcycle subject to EPA regulations constitutes tampering and is a violation of federal law. These products are designed for closed circuit competition use only. Triumph Accessory Silencers will require a specific tune download, which is available from your authorised Triumph dealer.

Specification may vary by market. Some accessories are prohibited by local law. As a motorcycle owner, it is your responsibility to comply with all local law. Check your local law and ensure that your motorcycle complies with all local law. If you have any doubt, contact your local authorities.

All details correct at time of going to press.

Triumph Motorcycles Limited reserve the right to make changes without prior notice. Please consult your dealer for model and colour availability.

This brochure is produced using 25% post-consumer waste, 25% pre-consumer waste and 50% virgin wood fibre sourced from well managed forests and other sustainable sources. Pulps used are Elemental Chlorine Free. The printing inks are made using vegetable based oils.

Authorised Triumph dealer.

How far do we go to test an accessory? About 120,000 miles

Triumph accessories get a rough ride.

They get endurance tested in exactly the same way as the bikes they're designed for – the equivalent of 120,000 miles real world riding in two weeks on a specially built track.

Then they get hammered by Triumph test riders doing thousands more real life miles on fully kitted bikes, on road, on track, in all kinds of weather and at speed.

Prior to sign off, accessories undergo further rigorous testing which includes humidity, salt spray, stability, durability, fit and function tests. There is no room for compromise. Triumph accessories only reach our dealers when the dedicated accessories team are happy to fit the accessories they've developed to their own bikes.

It's tough, but it's what makes a Triumph accessory as much a performance part of the bike as the engine or chassis.

Sixty8. A range of pretty cool accessories for Bonneville inspired by a pretty cool year. In 1968, bikes were anarchy. Revolution was in the air. The Rolling Stones were charting with Jumping Jack Flash. Steve McQueen made Bullitt and Triumph built a classic Bonnie they still talk about. Today's Bonneville owe their essential style to this '60s hero but the accessories, like the performance and handling, are bang up to date. Interchangeable tank covers, contemporary seat options and City Luggage. After all, who needs panniers that could swallow a tent when all you travel with is a laptop and an iPod?

Be original

Triumph Genuine Parts are the real deal.

Original equipment. The same parts that we use in the factory to build your bike. Fit them and you know without a shadow of doubt that you are replacing like with like. The same machined tolerances.

The same performance. The same obsession with safety and reliability. Ultimately, the same peace of mind.

And no compromise.

Self defence

All Triumph Motorcycles are equipped as standard with an alarm connector block within the wiring harness. This allows the Triumph alarm system to be correctly installed onto the machine without modification of the wiring loom.

The Triumph alarm system is a special development of the class leading S4 alarm system from Datatool.

Triumph alarms are designed specifically for each model to ensure compliance with insurance criteria, maximum security and quality of installation.
